

ELECTRONIC DISCHARGE SUMMARY (eDischarge / TTO)

Patient: KWAME MENSAH (Age: 81)

NHS No: 482 910 3341 DOB: 1945-03-14 Ward: Albert Ward (Cardiology & Acute Frailty)

Carer: Efua Mensah (Daughter & Primary Carer) - Tel: 07700 900123

Admission: 2026-09-28 Discharge: 2026-10-04 Consultant: Dr Simon Hughes

1. PRIMARY DIAGNOSIS

Clinical: Acute decompensation of chronic heart failure with reduced ejection fraction (HFrEF - LVEF 32%)

Plain words: Heart failure flare-up (water on the lungs and legs due to weakened heart pump)

2. MUST-KNOW MEDICINE CHANGES

• FUROSEMIDE (water tablet) — DIRECTION: INCREASED

Previous Dose: 40 mg | NEW DISCHARGE DOSE: 80 mg once daily in the morning

Clinical Rationale: DOSE INCREASED from 40 mg daily to 80 mg daily due to ongoing fluid retention

Exact Text: "Furosemide 80 mg oral tablets ... Direction of Change: DOSE INCREASED ... Previous Dose: 40 mg once daily in the morning ... New Discharge Dose: 80 mg (take ONE 80 mg tablet or TWO 40 mg tablets) ONCE daily in the morning"

3. UNCHANGED MEDICINES (CONTINUE AS NORMAL)

- bisoprolol (beta-blocker / heart rate tablet): 2.5 mg once daily in the morning
- ramipril (ACE inhibitor / blood pressure tablet): 2.5 mg once daily in the morning
- atorvastatin (statin / cholesterol tablet): 20 mg once daily at bedtime (night)
- paracetamol (pain relief tablet): 500 mg up to 1,000 mg up to four times daily as required

4. ACTIONS FOR GENERAL PRACTITIONER (GP)

- Urgent repeat serum U&Es and eGFR blood test within 7 to 10 days (by 14/10/2026)

5. RED FLAG SYMPTOMS (WATCH CLOSELY)

Weight Alert Threshold: 2 kg (4.4 lbs) or more over 2 consecutive days

- [!] Weight gain of 2 kg or more over 2 consecutive days
- [!] Worsening shortness of breath on exertion or lying flat (orthopnoea)
- [!] Noticeable increase in ankle, leg, or lower abdomen swelling
- [!] Persistent dizziness or lightheadedness upon standing

Quote: "A sudden weight increase of 2 kg (4.4 lbs) or more over 2 consecutive days, or 2.5 kg over one week"

6. EMERGENCY CONTACTS & WHO TO CALL

Primary Urgent Contact: St Thomas' Community Heart Failure Nurse Specialist Team

Direct Telephone: 020 7188 5678 (Monday to Friday, 09:00 to 17:00)

Out of Hours: NHS 111 | Life-Threatening Emergency: 999

7. FOLLOW-UP APPOINTMENT

Clinic: Cardiology Specialist Outpatient Suite 3 (St Thomas' Hospital, 3rd Floor Lambeth Wing)

Date & Time: Tuesday 20 October 2026 at 10:30 AM (2 weeks)

Seen By: Dr Simon Hughes (Consultant Cardiologist) & Heart Failure Nurse Specialist

Patient Action: Bring daily weight log and all current medication boxes

8. PATIENT & CARER BEDSIDE COUNSELING

- Fluid Restriction: 1.5 litres (approx. 2.5 pints) per 24 hours
- Weighing Instructions: Every morning after passing urine, before eating breakfast
- Diuretic Timing: Morning (07:00 - 09:00) to prevent nocturia and nighttime fall risk
- **WARNING: NEVER take over-the-counter anti-inflammatory painkillers such as ibuprofen, naproxen, or Nurofen**
